

# Coffee Brewing with Intelligence

The Only Microprocessor Driven System That Gives You More Than Just Coffee

User friendly scroll through menu allows you to simply program more than 17 features!

Brewing coffee involves more than just pushing a button. It involves choosing the correct equipment that will extract the full flavor from each coffee grind, giving you a delicious cup of piping hot coffee your customers will enjoy.

Cecilware's Coffee Brewers with "IT" will do that plus a whole lot more. "IT" gives you Total Control over the brewing cycle. From easily setting the brew temperature, to maintaining inventory control, to preventing unauthorized tampering with the brew cycle, Cecilware coffee brewers with "IT" take coffee brewing to the next level.

## WITH "IT" YOU CAN CUSTOMIZE YOUR BREW CYCLE WITH ALL THESE FEATURES!!!

- ✓ **Touch Pad Control Technology with LCD**
- ✓ **User Friendly Walk Thru Menus**
- ✓ **Custom Key Lock Control** - Prevents unauthorized tampering with the brew cycle.
- ✓ **Water Temperature** - To extract the rich, full flavor of coffee, "IT" allows you to set the optimum water temperature to the precise degree.
- ✓ **Low Temperature Lockout** - To help the brewing cycle reach its peak brewing performance, the Low Temperature Lockout feature prevents an operator from brewing coffee if the water tank temperature falls below the specified brewing temperature.
- ✓ **Set Brew Size** - gives precise brew control by volume.
- ✓ **Dispense Total** - By working in conjunction with your Inventory Control Management, this unique feature keeps track of the total brew cycles within a specified period of time and has a non resetable counter to control ounces dispensed.
- ✓ **Freshness Control** - Keeping coffee fresh and hot is simple with the exclusive "Freshness Control." Incorporated into all "IT" coffee brewers, just set the system once and an audio and visual response will remind you to brew a fresh pot.
- ✓ **Heat Reduction Warmers** - ensures an operator that a brewed pot of coffee will almost never become too hot or burn.
- ✓ **Pre-infusion - Pulse Brewing - Bypass** - These brew enhancement features can be easily set to suit your coffee brewing needs.
- ✓ **Sleep Mode** - Designed to save the operator money in electrical costs, "IT" 's Sleep Mode automatically starts when the brewer has not been used for four hours.
- ✓ **Programmable Timer with Battery Backup** - This feature turns the brewer on and off at any prespecified time. It will not brew coffee automatically, but will heat the water and get it ready for the brew cycle to begin.
